Diffusion in  
Brushed Aluminium

Graphic Illusion™ panels are created using an innovative process of a formed laminate over a solid wood core making them incredibly strong, impact resistant, and non porous. These panels complement residential, retail, commercial, and corporate environments.

---

Whether you are looking to make a statement or just seeking something different, Graphic Illusion™ panels can dramatically enhance interior environments. They display illusionary effects when combined with subtle directional lighting. The shadows created present stunning variations across the contoured surface.
