## Verstility / Durability / Choice / Quality

Slotpanel is a cost effective and space efficient form of merchandising that transforms displayed products. As a back drop, it creates a lasting, stylish impression, bringing out the maximum potential of products.

Slotpanel is a popular versatile display system, consisting of unlimited horizon grooves, which accommodate a large variety of fittings that conveniently slide into the slot.

From corporate offices to retail shops, Slotpanel can be used in most work environments. Its durability ensures a long lasting finish, no matter how many times displays are changed.

Slotpanel is manufactured in Australia, using premium grade 18mm MDF for maximum strength. It is machined by CNC routers which ensure a consistently accurate high quality finish.

Choose from the updated colour palette of selected popular colours, prints and woodgrains. Alternatively, Slotpanel can be supplied in a raw, ready to paint form.

# Slatboard

Slatboards available in either landscape or portrait as shown below.  
Standard groove spacing is 100mm centre to centre with a 1/2 groove at the top of the Landscape panel which is designed to conceal the joint behind the extrusion when one sheet is installed on top of another.
